

2015-2018 DODGE CHALLENGER COLORSHIFT RGB+W DRL REPLACEMENTS PART #1329-339

Featuring RGB+W functionality, this new kit allows you to utilize the existing "halo" DRL feature on your 2015-2018 Dodge Challenger and convert to Color-Changing rings while maintaining a true White DRL!

These replacement boards feature our traditional RGB ColorSHIFT technology along with an extra "White LED" which allows for truer white tones, a crisp white DRL color option and the ability to instantly switch over for 100% legal road driving.

This ColorSHIFT Light is controlled directly from your smartphone via an app to produce any color the user wishes. These DRL boards can make hundreds of different colors, dozens of patterns, control the brightness, and even the speed of the functions as well!
