

INSTALLATION INSTRUCTIONS

Step One: Removing the Door Panel.

- Make sure you are using adequate tools.
- Snap off the panel located on the inside of the door.
- Gently disconnect any wiring that may be attached.

Step Two: Using the Hole Saw.

- Remove the Hole Saw tool from it's packaging.
- Drill out correct size hole for projector light.
- Ensure even contact between surface and drill.

Step Three: Wiring to Power.

- Connect the red and black wires to power and ground.
- Use proper safety when handling electricity.
- Snap the door panel back on and you're good to go.
