## ORION COBALT AMPLIFIERS

The new Cobalt amplifiers are coming to change the complete vision of the car audio market. They offer more power, more quality and a much better price than any of their close competitors. Come and enjoy the Cobalt Series that Orion Car Audio has created for you. Orion Cobalt is presenting its new look and extended 16 line amplifiers which includes: three (2) channels, two mono-channel Class AB, four amplifiers of (4) channels, two of (5) channels amplifiers and five Class D amplifiers for subwoofers.

This new line will cover not only a wide variety but also the satisfaction of everyone; from the end consumer to our dealers and distributors. The new Cobalt amplifiers handle power ratings starting from the 300 watts up to a very powerful Class D for woofers capable to handle 5000 watts @ 1 ohm. Quality, power and pricing have been all put together to create the most efficient amplifier dollar per watt that the industry has ever seen, showing the power that has always characterized and defined Orion Car Audio.

## ORION COBALT MIDRANGES AND BULLET TWEETERS

Orion Car Audio, in its Cobalt series, incorporates a new extensive range of mids 6, 8, and 10 inches to the market as well as a variety of models for bullet tweeters of its own unique design. These new designs allow Cobalt to join the fast growing and demanding market of high efficiency, that is invading the world of car audio these days.

The Cobalt Midranges were made with the best and most efficient technology.

Tested in our laboratories and most important, in street cars; they offer the best price in the market.

The Cobalt Bullet Tweeter, also with its own design, sets us apart from the rest of the common market. They offer a very refined and strong look to the consumer who is eager to show and feel the power of the Orion Car Audio in their automobile and anyone that dares to compare it.

## ORION COBALT WOOFERS

The new woofers come with a series of improvements to the benefit of the consumer: more efficiency, better power and a much better sound quality.

Some of the changes made to the new innovative woofers include: a change of the surround, the increase of the travelling excursion, a much better low frequency response and, a new and innovative voice coil that being an entry level woofer, it is the only one in the industry to offer it, making the real power of it totally effective. We have also added the Dual Voice Coils series **(DVC)** that extends the possibilities and options of the product installation.

For the new car audio market enthusiast, **Cobalt** offers the best sound and the highest quality in its level.

## ORION XTR OFFERS A NEW LINE OF INNOVATIVE PRODUCTS

The new amplifier line offers more models than before to adjust to the requirements of the installer. Now with (4) 2 channels amplifiers, (5) 4 channels amplifiers and (4) mono channel for subwoofer this lineup will allow you to enjoy the music power in your car.

The XTR series innovates by offering the best power in their Class D mono subwoofer amplifier series which is calculated at only 12.6 Volt.

This indicates that the amplifiers contain a very wide and real power together with a high efficiency and quality sound.

The (4) channels and (2) channels amplifiers of higher power were modified by incorporating a system in the high pass cut, that allows to multiply by 10 its frequency and elevate it up to 15 KHZ.

Enjoy the power and quality that Orion XTR offers you in its new line.

## ORION XTR MIDRANGES AND BULLET TWEETERS

Orion **XTR** continues to improve this impressive series by adding a complete line of MIDRANGES in 6", 8" and 10" to the market, respectively together with some Bullet Tweeters designed and entirely owned by Orion. This supports Orion's decision to satisfy the increasing demand in today's market for high efficiency products.

The 2 **XTR** Midranges ferrite series are very efficient. The XTH series offers a Very High response to the midlevel frequency and can very well handle the Mid-High frequencies to the style of the European Midranges, and just like this one the XTX is more focused in its very powerful Mid-bass. We are also introducing some models of the so expected Bullet Tweeter, designed under a very unique style and completely owned by Orion.

## ORION XTR SUBWOOFERS

The new **XTR** Subwoofers bring a series of changes to the benefit of the consumer. Our new **XTR** handles a much higher power compare to its predecessor and also has a better low frequency response. High efficiency, more power and better.

High efficiency, more power and better quality sound together with its **NEW Basket**, owned exclusively by Orion, are just a few of the new features that will let you feel the total true power generated by your Woofer when it shakes up the body of your car.

## WITH NO DOUBT THE NEW ORION XTR PRO SUBWOOFER IS A TOTAL INNOVATION

With the most powerful **XTR Pro** Subwoofer of all times together with the latest innovation used in its creation, the **XTR Pro** subwoofer has inherited the true passion of Orion Car Audio.

From the beginning of times, Orion has been considered a brand of High Prestige and true Power in the industry. So thinking back in the philosophy of Orion Car Audio from the beginning we have recreated this truly and powerful new generation **XTR Pro** Subwoofer.

An impressively powerful new aluminum basket; designed and owned by Orion, the highest quality material used for its creation together with the latest technology developed in the industry of Car Audio is

what makes the **XTR Pro** Subwoofer absolutely the best of its class in the market. Orion has also considered a very accessible and incomparable price to make the **XTR Pro** Subwoofer your favorite.

Orion has added a new re-cone kit system to the **XTR Pro** series, very similar to our super powerful HCCA subwoofer. This will allow the replacement of the pieces with no difficulties and very easily in case the customer requires it. This is a unique and exclusive system owned and used by Orion Car Audio.

In conclusion, the high power, high performance and high efficiency are sure to give a lot to talk about in the market and car audio industry.

**XTR PRO IS PROUD TO BE LOUD!**

## THE ALL NEW HCCA AMPLIFIER SERIES

Orion has transformed the **HCCA** amplifiers to a super powerful sound machine.

In the new class D **HCCA** amplifiers for woofers, the power is being calculated at only 12.6 volts and only with a 0.5% THD which makes these amplifiers very powerful ones. They are truly sound monsters starting at 4000 watts RMS up to the super powerful HCCA 20000.1d that gives an amazing and truly twenty thousand

watts; something really and unbelievably amazing. All the (4) channels and (2) channels were modified by incorporating a high pass cut system that allows you to multiply by (10) the frequency and take it all the way to 15khz.

Technology, quality and extreme power were combined to create efficient and very powerful amplifiers, to satisfy the most demanding customers of our industry whose satisfaction is only the best.

## NEW HCCA MIDRANGES & BULLET TWEETERS

Orion **HCCA** is bringing two series of neodymium midranges to their line in order to achieve high power and high efficiency in the control of mid high frequencies.

In the "N" series you will find midranges from 6.5" up to 10" with very interesting power, high efficiency and good price.

With our next extreme competition series named "NHP", we can say that Orion has created one of the most powerful and efficient mids in the entire world. Even if we dared to compare this "NHP" series with the best mids created by famous European brands, we could say that the power and performance of Orion. HCCA NHP mids is superior.

With no doubt we are sure that this series brings a line of impressive products. Our audio lab test results were impressive and showed that we are offering a never seen before midrange completely out of the ordinary.

Our tweeter HCCA TN1 in neodymium is, in the bullet tweeter range, the most efficient product that exists in the whole car audio market.

The TN1 has absolutely no comparison with any other bullet tweeter available in the market. 118 db 1w/1m plus the curve capable of truly reaching a 26 kHz, the frequency stability and the sound quality makes the HCCA TN1 the best bullet tweeter in the planet.
