Instant Scanification™

Get the most extensive experience-based diagnostic information available.

Scanisfaction guaranteed.

New System 5.0

Code-Assist® Library

Quickly access real world proven fixes

Code-Assist® is a tech tip database of experience based fixes that help technician fix vehicles every day. With System 5.0, the library now contains 4.5 million fixes and is searchable. Further, an easy to find menu selection has been added to the Diagnostic Menu. In addition, once a DTC is selected, the next screen will display the Code-Assist® results screen. The specific Code-Assist tech tip is still available when a DTC is read.

Maintenance Test Information

Quickly find all maintenance tests and resets without having to search through multiple menus

Diagnostic tools are required by many OEMs to do simple maintenance tests, such as light resets, oil changes and brake bleeds. However, it is often difficult to find these tests on many diagnostics tools. System 5.0 includes a new Maintenance Test Information Screen that lists the appropriate control that contains the maintenance tests for that specific vehicle.

Repair-Trac® Tech Tips by Identifix®

Industry leading diagnostic information for faster repairs

When a DTC is not available, or if you just want to search for fixes by symptom, remember Repair-Trac®. Repair-Trac® is the largest database of known vehicle-specific fixes available in the automotive aftermarket.

Industry Leading OEM Level Software with even more Special Tests and System Coverage

Update your existing Genisys to access a whole new level of diagnostic capabilities

Domestic: 8974 new ECU combinations, 871 systems and over 2450 new actuator and adjustment tests.

Asian: 3550 new ECU combination, over 400 systems and over 1600 new actuator and adjustment tests.

European: 7782 new ECU combinations, over 780 systems and over 200 new adjustment tests.
