

OIL LIGHT RESET TOOL

Newly designed Oil Light Reset Tool has added vehicle coverage.

RESET OIL SERVICE LIGHTS

Oil changes are the #1 service your shop will perform each year. Enhance your service with this complete electronic tool and manual kit.

- The 3596J kit helps eliminate the need to take the vehicle to the dealer or use an OEM scan tool to reset oil service lights.
- Electronic tool set includes the adapters and interface module required to reset the oil service lights on Volkswagen, Audi, Mercedes Benz, BMW, and Volvo.
- The included manual details Oil Light Reset tool procedures as well as the manual reset procedures for domestic and import vehicles.
- The new Oil Light Reset Tool now gives you the ability to update the tool vehicle coverage by connecting to a PC with future update kits.

3596J-UPD – OTC Oil Light Reset Update Kit.

BMW	7-Series E65, E66	2002-2005	
Sample of manual contents			<ol style="list-style-type: none"> 1 Press THE RESET button on the top left side of the instrument cluster for 10 seconds to display a four (4) line menu in the speedometer. 2 Press the RESET button or LOWER AXIAL (FAS) button on the turn signal/high beam switch to scroll through the menu. 3 Select ENGINE OIL and press the RESET button for a few seconds to display a two (2) line menu in the tachometer. 4 Press the RESET (or AXIAL) button to select SERVICE AND MAINTENANCE. 5 Press the RESET button again for a few seconds
