

TIRE SERVICE

Tire Bead Seater, Hands Free Air Chuck, Bead Break, Tire Spoons

Get more done

With new tire service tools from OTC's trusted line

Technicians that are serious about servicing tires are going to be serious about OTC's new tire service line that kicks off this year with the Tire Bead Seater, Air Chuck, Bead Breaker and Tire Spoons. These tools take very difficult and potentially dangerous processes and make them easy and safe to perform in the shop environment.

Put serious, reliable tire service tools in your shop

TIRE BEAD SEATER

Gain more control with unique nozzle/valve assembly.

5713 TIRE BEAD SEATER

The Tire Bead Seater is used when a tire, new or used, is mounted on a wheel and the tire bead does not touch both sides of the wheel, making inflation possible. The air trigger on this tool expels a tremendous burst of air that inflates the tire to seat it to the wheel rim. This allows the tire to be inflated to the recommended pressure through the tire valve.

- ✦ The Tire Bead Seater is equipped with unique configurations that enhance ease of use, productivity and safety for technicians looking to get the job done right every time.
- ✦ Unlike other options out there, the Tire Bead Seater's ASME certified 13-gallon tank is designed with a nozzle and valve connected via hose assembly, giving the user more control rather than requiring them to hold the weight of the tank.
- ✦ The trigger style discharge valve allows for optimum airflow control while allowing both hands to firmly hold the nozzle/valve assembly, critical for effective and safe use. Wheels and handle function in either the vertical or horizontal position for easy mobility and storage.
- ✦ Unique nozzle design significantly reduces "blowback recoil" and contains discharge holes strategically placed for optimum inflation of a wide range of the tire sizes and wheel diameters.
- ✦ Air valve included for filling tank, which also provides compressed air for filling the tire while seating the bead, optimum for on-the-road service.

5700 ACCESSORY TIRE BEAD SEATER

- ✦ 5700 Accessory Tire Bead Seater can be added to the existing surge tank found on most tire changers.

Add the most effective bead seater to your tire changer!

AIR CHUCK & TIRE BEAD BREAKER

Make bead-seating a one-man job.

5745 HANDS FREE AIR CHUCK

- ✓ Perfect for applications where the tire valve is facing the floor while seating the tire bead, such as most dual wheel configurations.
- ✓ Hooks on the top bead seat of the wheel and the spring pressure holds the chuck on the tire valve pointing to the opposite side.
- ✓ Ball valve included to allow inflation only when needed.

The new Hands Free Air Chuck makes bead-seating a one-man job!

Adjustable collar for various wheel widths.

5728 TIRE BEAD BREAKER

- ✓ Unique head is designed to provide a large striking area for all angles, while providing the mass needed to break the tire bead.
- ✓ This design puts the force exactly where it's required and eliminates the possibility of accidentally hitting the wheel, problems typically encountered while using larger swing hammer style bead breakers.

Excellent for damaged tires or tires with weak sidewalls where conventional bead breakers will not work.

Handle keeps your other hand away from the striking surface.

TIRE SPOONS

HD Sliding, Dual Sliding, Extending, Standard Style Tire Spoons

TIRE SPOONS

Unique "Convex Slip Head" curved design allows the spoon to slide easily into the tire bead while the spoon bump limits the depth for quick-and-easy operation.

5716	HD Sliding Tire Spoon 38" extends to 52", 3/4" diameter. Inner slide bar provides hammer action to easily insert and remove the spoon.	
5720	Sliding Dual Tire Spoon 35" and 3/4" diameter. Unique configuration provides mount and demount heads on either end with the aid of a slide hammer mounted mid bar, allowing for hammering either end in or out of the tire bead. Twist-lock feature locks 3.5 lb. slide weight in position.	
5724	Extending Tire Spoon 22" extends to 34", 3/4" diameter. Twist-lock feature allows the spoon to be extended to any length and locked into position with a twist of the collar.	
5735-35	35" Curved/Flat Tip Curved Tire Spoon Double end curved tire spoon. Handle knob enables easier spoon pick up. 3/4" diameter.	
5736-24	24" Curved Tire Spoon Handle knob enables easier spoon pick up. 3/4" diameter.	
5736-30	30" Curved Tire Spoon Handle knob enables easier spoon pick up. 3/4" diameter.	
5737-30	30" Flat Tip Curved Tire Spoon Handle knob enables easier spoon pick up. 3/4" diameter.	
5739-24	24" Curved Shank Tire Spoon The curved shank allows improved access for the spoon head around the tire bead or wheel rim. Handle knob enables easier spoon pick up. 3/4" diameter.	
5739-30	30" Curved Shank Tire Spoon The curved shank allows improved access for the spoon head around the tire bead or wheel rim. Handle knob enables easier spoon pick up. 3/4" diameter.
