

CAM-TY11

Reverse Camera T-Harness for Select
Toyota, Scion, Subaru Vehicles

Introduction & Features

The CAM-TY11 is a reverse camera T-harness that gives the ability to add a reverse camera input for compatible TOYOTA, SCION, and SUBARU 6.1" touchscreen radios. Simple plug and play installation.

Installation

1. Dis-assemble dash and remove the radio.
2. Unplug 16 pin plug shown in pictures below. Install the T-harness as shown.
3. The harness will provide 6 volt power output, if you are using a camera that is NOT capable of being powered by 6 volts, you must find your own source of 12 volt ACC power.
4. Camera must have power before the vehicle is placed into reverse, so using the reverse lamp power source is not an option.
5. No reverse trigger is needed, as long as the camera has power when the vehicle is placed into reverse, the radio will automatically switch to the reverse camera image.

Applications

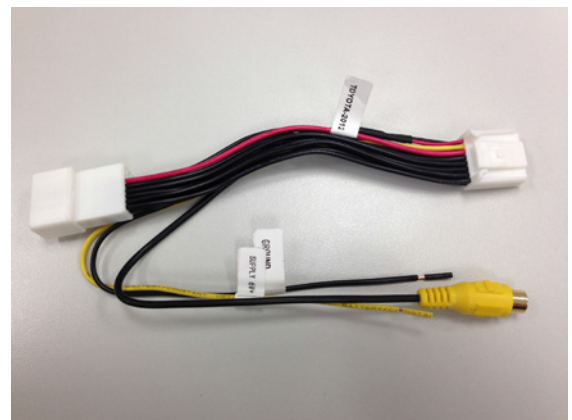

2012-2014	TOYOTA	4-Runner, Avalon, Camry, Highlander, Prius 3, Prius C, Prius V, Rav-4, Venza
2013-2014	SCION	FRS
2013	SCION	XB
2013-2014	SUBARU	BRZ
