# Introduction

Thank you for purchasing the iSimple® PXAUX. The PXAUX is designed to provide endless hours of listening pleasure from your factory radio. To ensure that your auxiliary audio input performs correctly with your radio, we recommend that you read this entire manual before attempting installation of the PXAUX. This interface allows connectivity for two auxiliary audio inputs.

## Dipswitch Settings

(ISTY531 & ISHD531 ONLY)

	Application	Dipswitch 1	Dipswitch 2	Dipswitch 3	Dipswitch 4
Honda	All Vehicles with XM button	Off	Off	Off	Off

Toyota	2010-2011 Camry with AM-SAT button	On	Off	Off	Off
	2012+ vehicles equipped with non-navigation touchscreen radio	On	Off	Off	Off
	Vehicles equipped with navigation	On	Off	Off	Off
	All Other Vehicles with AM-Sat button	Off	Off	Off	Off
	All other Vehicles Wwithout AM-Sat button	Off	Off	On	Off

# Installation

1. When making electrical connections it is always recommended that the vehicle's battery be disconnected from the electrical system before performing the installation.

**Please Note: If the radio is equipped with a built in CD Changer, please remove ALL discs before proceeding to prevent damage to the radio's CD mechanism.**

2. Carefully remove the trim panels covering the bolts that secure the radio into the dash cavity. Remove these bolts, and carefully pull the radio from the dash of the vehicle. This will provide access to the factory radio connectors where you will connect the vehicle specific harness.
3. Disconnect the factory harness (if present) from the back of the radio. If you are installing the PXAUX into a Toyota or Honda with an external CD Changer and you are using CD Changer emulation mode, the CD Changer will have to be disconnected at the changer location for proper operation.
4. Connect the 8-Pin auxiliary input cables to the ports on the PXAUX
5. Plug in the male connectors on the vehicle specific harness into the port on the back of the radio. Next, connect the factory harness (if present) into the female connector on the vehicle specific harness. Be sure to make a firm connection but do not force it. Plug the Black micro-fit 24-pin connector on the vehicle specific harness into the PXAUX.
6. To complete the installation secure the PXAUX into the cavity in the dash behind the radio. Be sure that the cables and interface modules are not near moving parts or sharp metal edges as they may damage the cables. To prevent rattling noises inside the dash, use zip ties, tape, or other fasteners to mount the interfaces securely.
7. With all connections made, reconnect the vehicle's battery, insert the key into the ignition, and turn the vehicle on. Check for proper operation of the PXAUX before reinstalling the factory dash panels.
8. Note: The first time you access the PXAUX, your radio may display "DEV INIT" while the device is initializing. If this is displayed, please wait one minute then cycle the ignition off and on. Then access PXAUX mode again to begin normal operation.

# Ford/Lincoln/Mercury ISFD531 Operation

## Selecting AUX:

Press the “AUX” or “SAT” button (SR123 icon on navigation radio) until “AUX1” is displayed on the screen. When you press the “AUX” button, you will see the corresponding “SAT” modes, a slight delay, and then the current mode will be displayed.

## Selecting between AUX1 / AUX2

Press the “AUX” or “SAT” button (SR123 icon on navigation radio) until “AUX1” or “AUX2” is displayed on the screen.

# General Motors ISGM531 Operation

## Non Navigation

### Selecting AUX

Press the “BAND” button a few times until “XM” is displayed on the screen. Immediately turn the rotary knob in the top right hand corner to scroll through available sources. Once “AUX1” is displayed, press the “FWD>>” button to select it. If you are currently in “SAT” mode you will need to press the “▶| SEEK” button instead of “FWD>>” to select “AUX1” mode.

### Selecting between AUX1 / AUX2

If you are currently in “AUX1” or “AUX2” mode turn the rotary knob to cycle through the available sources. Once “AUX1” or “AUX2” is displayed on the screen press the “FWD>>” button to select it.

## Navigation radio operation

### Selecting AUX

Press the “FM” button then press the “XM” button. Immediately turn the rotary tune knob in the top right hand corner to scroll through available sources. Once “AUX1” is displayed, press the “▶” button on the screen to select it. If you are currently in “SAT” mode, press the “SEEK ▶|” button instead of the “▶” button to select “AUX” mode.

### Selecting between AUX1 / AUX2

If you are currently in “AUX1” or “AUX2” mode, turn the rotary knob to cycle through the available sources. Once “AUX1” or “AUX2” is displayed on the screen, press the “▶” button to select it..

# General Motors ISGM532/ISGM533 Operation

### Selecting between AUX1 / AUX2

To select “AUX2” press preset #2. To select “AUX1” press preset #1.

## Troubleshooting

<b>Symptom</b>	<b>Cause</b>	<b>Remedy</b>
Radio shows “DEV INIT”	PXAUX device is initializing.	This only occurs the first time the PXAUX is powered on. Wait a few minutes, cycle ignition off and on then enter SAT mode.
Radio does not recognize module.	Dipswitches are not set properly or the unit did not initialize properly.	See connection diagram for proper dipswitch setting. If the dipswitches are set properly disconnect the 24 pin micro-fit connector from the PXAUX for 5 minutes to reset the interface.
No sound.	Auxiliary cable is not connected to accessory or PXAUX.	Verify that the auxiliary cable is connected to the PXAUX and the accessory.
