

# NEW PRODUCT ANNOUNCEMENT

## 2014 CHEVY SILVERADO 1500 2WD/4WD GAS 3" LIFT PART NUMBER 10293

Performance Accessories [Body Lift](#) raises the vehicle's body 3 inches over the factory frame allowing for the use of up to 33" tires while maintaining OEM suspension geometry and improving the on and off-road capabilities. When you purchase a lift kit for your truck or SUV you want to go home and install it, with no problems. We work to make that a reality. Not only do we design every body lift kit right here in Chino Valley, AZ, USA, we also manufacture all the parts and assemble all of the kits as well.

Remember to order your set of custom fit urethane Gap Guards to hide the gap between frame and body, and keep the engine compartment clean. Put them together and you have a winning combination!

- Maintains a superior factory ride
- Does not affect the factory suspension geometry
- Maintains the vehicle's factory turning radius
- Can be used with OE wheels
- Does not affect the vehicle's driveline
- Provides a lower center of gravity than a full-suspension kit with the same amount of lift
- Can be completely removed if necessary
- Allows Dealers/Jobbers the ability to sell a complete lift with wheels and tires to customers with a limited budget
- Improves the vehicles overall resale value
- Install time: 5-6 hours
