

# NEW PRODUCT ANNOUNCEMENT

## 2014-2015 TOYOTA TUNDRA 5.5" LIFT PART NUMBER PLS573

Performance Accessories' Premium Lift System for 2014-2015 models Toyota Tundra pickups, provides a solution for your customers who want to run larger tires, but don't want to alter the factory ride or concerns over the vehicle warranty voiding at the dealership. Made in the U.S.A., the Performance Accessories Premium Lift System (PN-PLS573) combines the industry's highest-quality body-lift and leveling kit, to raise the vehicle 5.5-inches; allowing the use of up to a 35-inch diameter tire.

This system fits 2WD & 4WD Toyota Tundra models, and comes with high pressure fiberglass reinforced nylon lift blocks, precision laser-cut steel bumper brackets, strut extensions with differential drop spacers, a CNC machined steering shaft extension, heavy-duty hardware, and urethane wheel-well extensions (Gap Guards) that conceal any gaps between the body and frame.

- PLS Kits maintain a superior factory ride
- Does not affect the factory suspension geometry
- Maintains the vehicle's factory turning radius
- Can be used with OE wheels
- Does not affect the vehicle's driveline angles
- Provides a lower center of gravity than a full-suspension kit with the same amount of lift
- Maintains factory vehicle warranty.

- Allows Dealers/Jobbers the ability to sell a complete lift with wheels and tires to customers on a budget
- Install time: 9-10 hours
