Chevy/GMC	2011-2015	2500 / 3500 Series	Not available

FIT CHART NOTES:

- 1 Distance between bed crossmembers measures 16-3/8"
- 2 Distance between bed crossmembers measures 17"
- 3 Kit not available unless you have a channel crossmember
- 4 True '88-'98 trucks have a main frame crossmember that opens up. Some GM '88-'90 models require the P046-UK due to their downward facing crossmember.
- 5 True '99 trucks have a 3" round crossmember. Some GM '99-'01 models require the P046-UCK (long beds) or P046-UCSBK (short beds) due to their upward facing crossmember.
- 6 All P046-UCLB99K kits require bed reinforcements.
- 7 1999 - 2015 Chevy trucks may require a fuel filler extension. First, measure the diameter of your filler tube and request that diameter filler elbow. Or you can shorten your filler, mount directly on the tank, and raise bed a short distance when fueling.
