

Performance Brake Hose Upgrade

Your old rubber hoses can soften or swell over time and may result in a soft brake pedal. Power Stop stainless steel braided hoses provide a quicker, firmer and more consistent pedal response by maintaining more consistent brake pressure.

High Quality

DOT Certified and made with premium PTFE hose with permanently crimped-on zinc plated steel fittings

Easy Install

Includes all the necessary mounting brackets, bolts and washers for a fast and easy install.

Long Lasting Protection

Red PVC outer cover provides superior protection from abrasions & corrosion.

Looking for dependable performance brakes, pads, rotors? Rely on PowerStop for quality and long-lasting products.
