

## **NEW - PC99250 CABIN AIR FILTER**

2003 - 1999 DODGE RAM VANS

1500-3500 SERIES

ALL ENGINES

This filter is designed to capture contaminants and dust traveling through the rear A/C unit duct work. Should be inspected for possible replacement every 30K miles.

For Models equipped with Rear A/C. This filter is attached to the combination coil unit located in the A/C unit, which is passenger compartment between the fuel filter inlet housing and the rear wheel housing near the left rear side. A trim cover is mounted to the unit. This filter is designed to capture contaminants and dust traveling through the rear A/C unit duct work.
