INTRODUCING Easy Coat Tire Dressing

Easy Coat Tire Dressing is a water-based, body shop safe dressing intended for use on exterior rubber and plastic surfaces. This high quality and economical dressing contains no silicone, making it ideal for use in body shops.

Directions for use: make sure that the surfaces to be treated are clean and dry. Spray onto an applicator pad and wipe with a thin, even coat. Wipe off excess and even finish with microfiber towel or applicator. Let surface air dry. For best results on tires, do not move vehicle until dressing is dry as excess material may be thrown off onto adjacent panels. Not for use on vinyl tops.

PACKAGE SIZES

1 Gallon	Part# 134401	5 Gallon	Part# 134405
----------	--------------	----------	--------------
