

# SpeedFix Mirror

30-0101

## Installation Instructions:

**Mirror is configured for driver side out of box.**

- Turn mirror head to horizontal position
- Loosen all 5 knobs to allow mirror to conform to vehicle mirror
- Determine whether mirror will be used on driver or passenger side of vehicle. Follow instructions on how to change to passenger side configuration.
- Place mirror on vehicle mirror housing with bottom of clamp bracket fitting between vehicle mirror housing and mirror glass.
- Slide brackets on mirror rod to obtain best alignment. Slightly tighten the four bracket knobs.
- Continue to adjust brackets until you have achieved the best fit.
- Tighten all 5 knobs ( be careful not to over tighten ) and adjust mirror to best viewing position.

Passenger side configuration

## Changing from driver side to passenger side configuration:

Remove and rotate clamps to change from driver to passenger side mirrors  
Remove mirror head with Phillips screw driver to remove and rotate inside clamp

### Warning!

Do not over tighten.

Check frequently to make sure mirror is secure.

Remove when not towing.
