

## ▶ BLACK SERIES SHOCKS & COILOVERS

The Black Series are the most advanced shocks that Pro Comp has ever offered, providing superior performance both on-road and off. Top-of-the-line materials and hand crafted assembly result in unmatched quality no matter what terrain lies in your path.

Black Series shocks and coilovers use large diameter grained steel bodies (2.75-inch for the coilovers and 2-inch for the smooth body shocks) and fills them with high end components between the anodized black aluminum end caps.

Each Black Series coilover and monotube shock is fitted with Viton O-rings. These contain the high pressure nitrogen charge that works in concert with the shock oil and race-inspired shock pistons to shed heat and reduce fading when pushed hard. NitroCarb shafts are standard for improved resistance to corrosion and fatigue. Coil springs come installed on the coilovers, with an adjustable preload collar to fine tune ride height.

The rebuildable design of the Black Series shocks allows you to replace the seals and shock oil and recharge them with nitrogen, making them the last set of shocks you will ever need to buy.

- ✔ Monotube shock body with Viton O-rings
- ✔ 5/8" hardened NitroCarb shock shaft
- ✔ Rubber lower mount bushing
- ✔ Heavy duty oil seal pack
- ✔ Rebuildable design
- ✔ Anodized black aluminum end caps
- ✔ Hand-assembled to exact specifications
- ✔ Zinc plating with clear UV protecting top coat and gloss polyurethane clear coat
- ✔ Custom valved for each specific application

off-road driven!™
