

CONTROL ARMS

RACE INSPIRED DESIGN FOR
LIFTED, LEVELED OR STOCK TRUCKS

■ DURABLE PTMEG PIVOT BUSHINGS FOR LONG LASTING PERFORMANCE

■ HEAVY DUTY CHROMOLY CONSTRUCTION

■ ZERK FITTING FOR EASY SERVICE

■ REINFORCED PIVOT BUSHING MOUNT

■ STAINLESS STEEL FK UNIBALL JOINTS

■ BILLET DUST CAP

The new Pro Comp Pro Runner™ Control Arms deliver amazing performance and increased durability for lifted, leveled or stock trucks. The factory upper control arms' weak ball joints and stamped steel construction are not designed to handle off-road use. Pro Comp has engineered the new Pro Runner™ Control Arms utilizing oversized stainless steel FK uniball joints. The big uniball joints provide unparalleled strength over factory ball joints. Heavy duty 1.25" chromoly tubular construction and reinforced pivot bushing mounts are used to eliminate flex and handle the added load from extreme suspension cycling. Large PTMEG pivot bushings are equipped with Zerk fittings for easy maintenance and quiet operation. Each arm is finished in a durable black powder coat finish for years of lasting performance.
