➤ NEW 3.5-INCH LIFT KIT FOR 2-DOOR JK

This all new 3.5-inch lift for the 2-Door JK was designed to provide a great ride on-road while letting you play off-road as well. Kits feature both front and rear adjustable chromoly track bars with Heim joints to allow you to center your axle and flex without binding. The coil springs are tuned perfectly with our top-of-the-line Pro Runner or ES9000 shocks and sit tall enough to easily clear 35-inch tires. Brake line brackets are included. Pro Comp's exhaust spacer kits and shocks are also available separately.
