PRO

RUNNER™

Monotube Shocks

Pro Comp is proud to announce the release of nearly one hundred suspension systems featuring high performance Pro Runner monotube shocks. At the heart of the shock is the gas-charged monotube design that delivers superior performance compared to traditional twin tube shocks. The brushed and zinc-plated, clear coated body is nitrogen gas pressurized to eliminate performance-robbing cavitation during compression and rebound. This allows the shock to dissipate heat more efficiently. The Vehicle Specific Ride Tuning (VSRT™) in each shock was derived using extensive dyno and real world testing.

Each system is precision engineered for each application to deliver maximum performance and control and is available for all popular late model 1/2 ton and 3/4 ton trucks from Chevrolet, Ford, Jeep, Nissan, Ram, and Toyota.
