

INSTALLATION INSTRUCTIONS – 100% NEW Alternators (Absolutely NO Rebuilt Components)

Thank you for purchasing this alternator. You can depend upon the reliability and consistency of an alternator that is entirely new, while enjoying the affordability of a rebuilt unit. No longer is there reason for compromise. Each alternator is individually computer-tested and supplied with its own Quality Assurance graph documenting the unit's performance.

Easy one wire hook-up for hard-to-wire automobiles, trucks, and boats!

Here is the convenient answer to those hard to solve alternator replacement problems. Just mount this unit so that the pulley rotates and run a 10-gauge wire from the battery (positive terminal) to the back of the alternator.

That's it! Dependable regulated 12-volt power ready to use.

Attach 10-gauge
hot wire here,
and it is ready
to supply
electricity.

NOTE: If you experience charging problems after installing, bring RPMs up to 2,500. This will activate the regulator.
