

POLISHED STREET AND ROD RESERVOIR

PSC now offers a Polished Street and Rod version of our off-road racing proven power steering fluid reservoir.

PSC reservoirs are manufactured from 6061T6 Aluminum and are TIG welded together with the best welds you will ever see. Another great feature of this reservoir is the 35 micron cartridge filter that can be serviced from the large fill cap. The Polished Street and Rod Reservoir is a completely serviceable power steering system that allows you to perform regular oil and filter changes.

PSC also offers a reservoir configuration that is designed for hydroboost brake systems.

- Replaceable Wix 51418 filter
- 6AN return fitting and 10AN feed fitting to pump
- Universal mount clamp included
