<i>Special Tools</i>
1. Electrical tape (if needed)
<i>Installation Tools</i>
1. Screwdriver (Phillips)

LED TAILGATE LIGHT BAR WIRING AND INSTALLATION

1 Pre-installation preparation.

Verify the kit contents (check against parts listing). Remove any protective wrapping from the light strips or bolt kit.

2 Attach LED tailgate light bar to vehicle.

Place the light bar above the license plate and center between tailgate and license plate. **Note: Make sure the word "TOP" on the tailgate light bar is on pointing upward.** Mark mounting holes with a marker. Secure the light bar to the vehicle.

3 Wire LED tailgate light bar into electrical system

Use the included color-coded wiring harness and splice each wire to the appropriate wire on your vehicle's tail lamps. Be sure to cover each splice with electrical tape or other electric product.

LED Light Wire	Existing Tail Lamp Wire
Red	Brake light
Yellow	Left turn signal
White	Ground/negative
Green	Right turn signal
Brown	Running/parking light
