PUTCO'S MOST POWERFUL HEADLIGHT KIT

DESIGNED FOR MAXIMUM DOWN-ROAD PUNCH

[ATC] ADVANCED THERMAL CONTROL

Our patented flexible heat-sink is the most advanced heat management system available on the market. Our solid state design is scientifically proven to maximize performance and the bulbs life span through superior heat mitigation.

EC EASY-CLOCK™ COLLAR

Our new built in clock-able collar design allows for quick and easy adjustment of the light beam. This allows you to point the angle of the beam exactly where you need it.

⚡ FULL SURFACE ANODIZATION

Non-reflective nickel finish to eliminate light ray interference inside lamp housing.

SSD SOLID STATE DESIGN

No moving parts means a stronger design and more reliable product.

NITRO LUX

OUR MOST POWERFUL BULB EVER DESIGNED

Through technology using Japanese micro capacitors we have been able to introduce a smaller integrated anti-flicker circuit built right into the driver, eliminating the need for an external CANBUS module. Paired with our patented woven heat sink, the Nitro Lux® headlight kit is the best choice for any application. Anything from a low beam, high beam, projectors, to fog lights. This headlight kit provides the same cool white color temperature that our previous generations offered with many new updated features to all aspects of the headlight kit. The Nitro Lux kit is the culmination of all the experience and technology learned from previous generations of LED headlight kits wrapped into one new cutting edge bulb.
