

Thanks for purchasing Pypes Performance Exhaust 304 Polished Stainless Steel Exhaust Extensions

- These tips are designed to slip fit over 2-1/2" or 3" exhaust tubing.
- Our HVC21 or HVC24 one inch wide band clamps are designed for these tips.
- They may be welded on using a standard mig welder.
- Self-tapping sheet metal screws may also be used to mount the tips.
- Polishing must be done on a frequent basis to keep these tips looking shiny and new as they may tarnish from the heat or road elements. Polishing can be done with any auto store purchased metal polish.
