

Instructions for the **TRIO-GOLD Series**

(Single Filament Bulb Bases include H1, 5202, 9006, 9012, H7, H3, 9005, H11, 880)

After installing the bulb and plugging the LED into the factory plug, you can cycle the KELVIN colors by using the factory switch of the vehicle. When the LED is first turned on the default color and would be 6K.

By flipping the factory switch on and off the color of the LED will switch to 3K.

By flipping the factory switch on and off again. the LED will switch to 5K.

When vehicle's ignition shuts off the KELVIN color will return to the 6K default.

For dual filament bases see next page.
