

RSJL50240- 2018 JEEP JL Complete 52in Light bar Kit - (1)
52in LoPro Series® Light bar with brackets and wire
switch harness

- 1.** Start by removing factory bolts on wiper cowl of the vehicle.

- 2.** Use supplied bolts and spacers to mount brackets on wiper cowl on the hood of the vehicle. Do not tighten the bolts hand tighten only for now.

3. Once the brackets are mounted on the hood you may mount light bar to the hood brackets. Run the wire through the crevasse between the fender and wiper cowl of the vehicle.

4. Start running relay harness to the battery and switch to desired location in the inside of the vehicle.
5. Now you may tighten all bolts and adjust light bar to desired location. Test and enjoy.
*Don't forget that you may use our other brackets for the 3x3 cubes alongside and finish up the great look.
