# RSSBKIT48 & RSSBKIT60

CONTAINS

PLASTIC BRAKETS

SCOTCHLOCKS

ALCOHOL WIPES

TWO LED STRIPS

INSTALL INSTRUCTIONS

Step 1- open package to verify you have received all items that come with kit.

Step 2- thoroughly clean the surface where you plan on mounting the LED strip. (A dirty surface will prevent the strip from attaching firmly.)

Step 3- wipe the clean surface with the alcohol wipe.

Step 4- Firmly press the LED strip to the mounting area and hold for 3 seconds. Optional: screw on the included brackets to strengthen the install.

Step 5- Wire LED as following.

Red Wire- Positive 12Volts to Parking Lights for Constant Amber LED

Black Wire- Ground Wire

Yellow Wire- Positive 12Volts Turn Signal for Sequential Amber LED.

White- Positive 12Volts Door Triggers for White LED.

Step 6- Loom or insulate someway wiring to keep away moisture or any other elements from wire, use zip ties to tuck away any excess wiring.

Final Step- Test functionality if any issues verify, you're wiring and connections, if problem persists please feel free to contact tech support.
