

COLORADAPT[®] UNDERBODY KIT - **SKU: RSUKIT**

KIT INCLUDES:

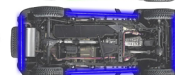

- (2) 36" ALUMINUM RGB UNDERBODY STRIP CHANNELS
- (2) 48" ALUMINUM RGB UNDERBODY STRIP CHANNELS.
- (4) EXTENSION CONNECTER CABLES (CAN BE PURCHASED SEPARATELY IF NEEDED - PART #RS3EW)
- CONTROL MODULE AND CREDIT CARD REMOTE
- TWO DIFFERENT STYLES OF CONNECTORS (HARD WIRE OR CIGARETTE LIGHTER STYLE)

INSTRUCTIONS:

1. Bench test the kit to ensure proper functionality before installing.
2. Plan out placement of the RGB strips - they are ideally placed on the front, rear, and sides of vehicle like in the diagram below. Make sure all wires and RGB strips are clear of any moving components of the vehicle as well from any direct heat source. The control box must be installed in a dry location. The controller could fail if exposed to moisture.

COLORADAPT!

- A - (2) 48" Aluminum Channel w/ Silicone Sealed RGB Multi-Color LED Strip (Right & Left)
- B - (2) 36" Aluminum Channel w/ Silicone Sealed RGB Multi-Color LED Strip (Front & Rear)
- C - Wireless RGB LED Controller

WARNING: THIS KIT IS FOR OFF-ROAD USE ONLY.

Please check your state and local laws before installing this LED underbody kit. Every state has different policies and procedures in place regarding aftermarket vehicle accessories. Race Sport Lighting is not responsible for any fines that you may receive while using this underbody kit.

COLORADAPT[®] UNDERBODY KIT - **SKU: RSUKIT**

3. Once you have everything planned out, you may attach the RGB underbody in desired location with the supplied hardware. Once the connections are made, use heat shrink or tape over the connectors to prevent any moisture.

4. Now that everything is mounted and all wires are secured, you can power on the control module. The kit has 2 different options for power - hardwired or with a cigarette lighter plug. If you wish to use the cigarette lighter, just plug into the cigarette lighter receptacle.

If you choose the hardwire option, you may use the second harness to connect to the battery or ignition. We strongly suggest wiring a switch to power on/off the underbody kit.
