

High performance and complete safety

The bestseller. A completely new optimization software with enhanced engine-specific adjustments, high-quality hardware as well as a comprehensive service and warranty package will make every driver's heart beat faster.

+25% HP¹ +25% TQ¹

6 fine tuning mappings

The RS is supplied with the right map for your engine. 6 fine tuning mappings (selectable by Rotary Control Pro) allow you to choose a map to suit your mood or the engine characteristics.

Up to +20% MPG

The RS increases the torque available and efficiency at the given engine speed. Therefore a higher gear can be selected, less gear-changing is necessary in general, and fuel is used more efficiently. As a result, your car's MPG can be increased by up to +20%.

App control

As one of the first international chip tuning companies, RaceChip has developed a combination of chip tuning and app. This lets you customize your vehicle's performance characteristics like never before. The combination of chip and app works easily via Bluetooth or your smartphone. You can download and get to know the RaceChip app for free.

A new driving experience in your own car with RaceChip

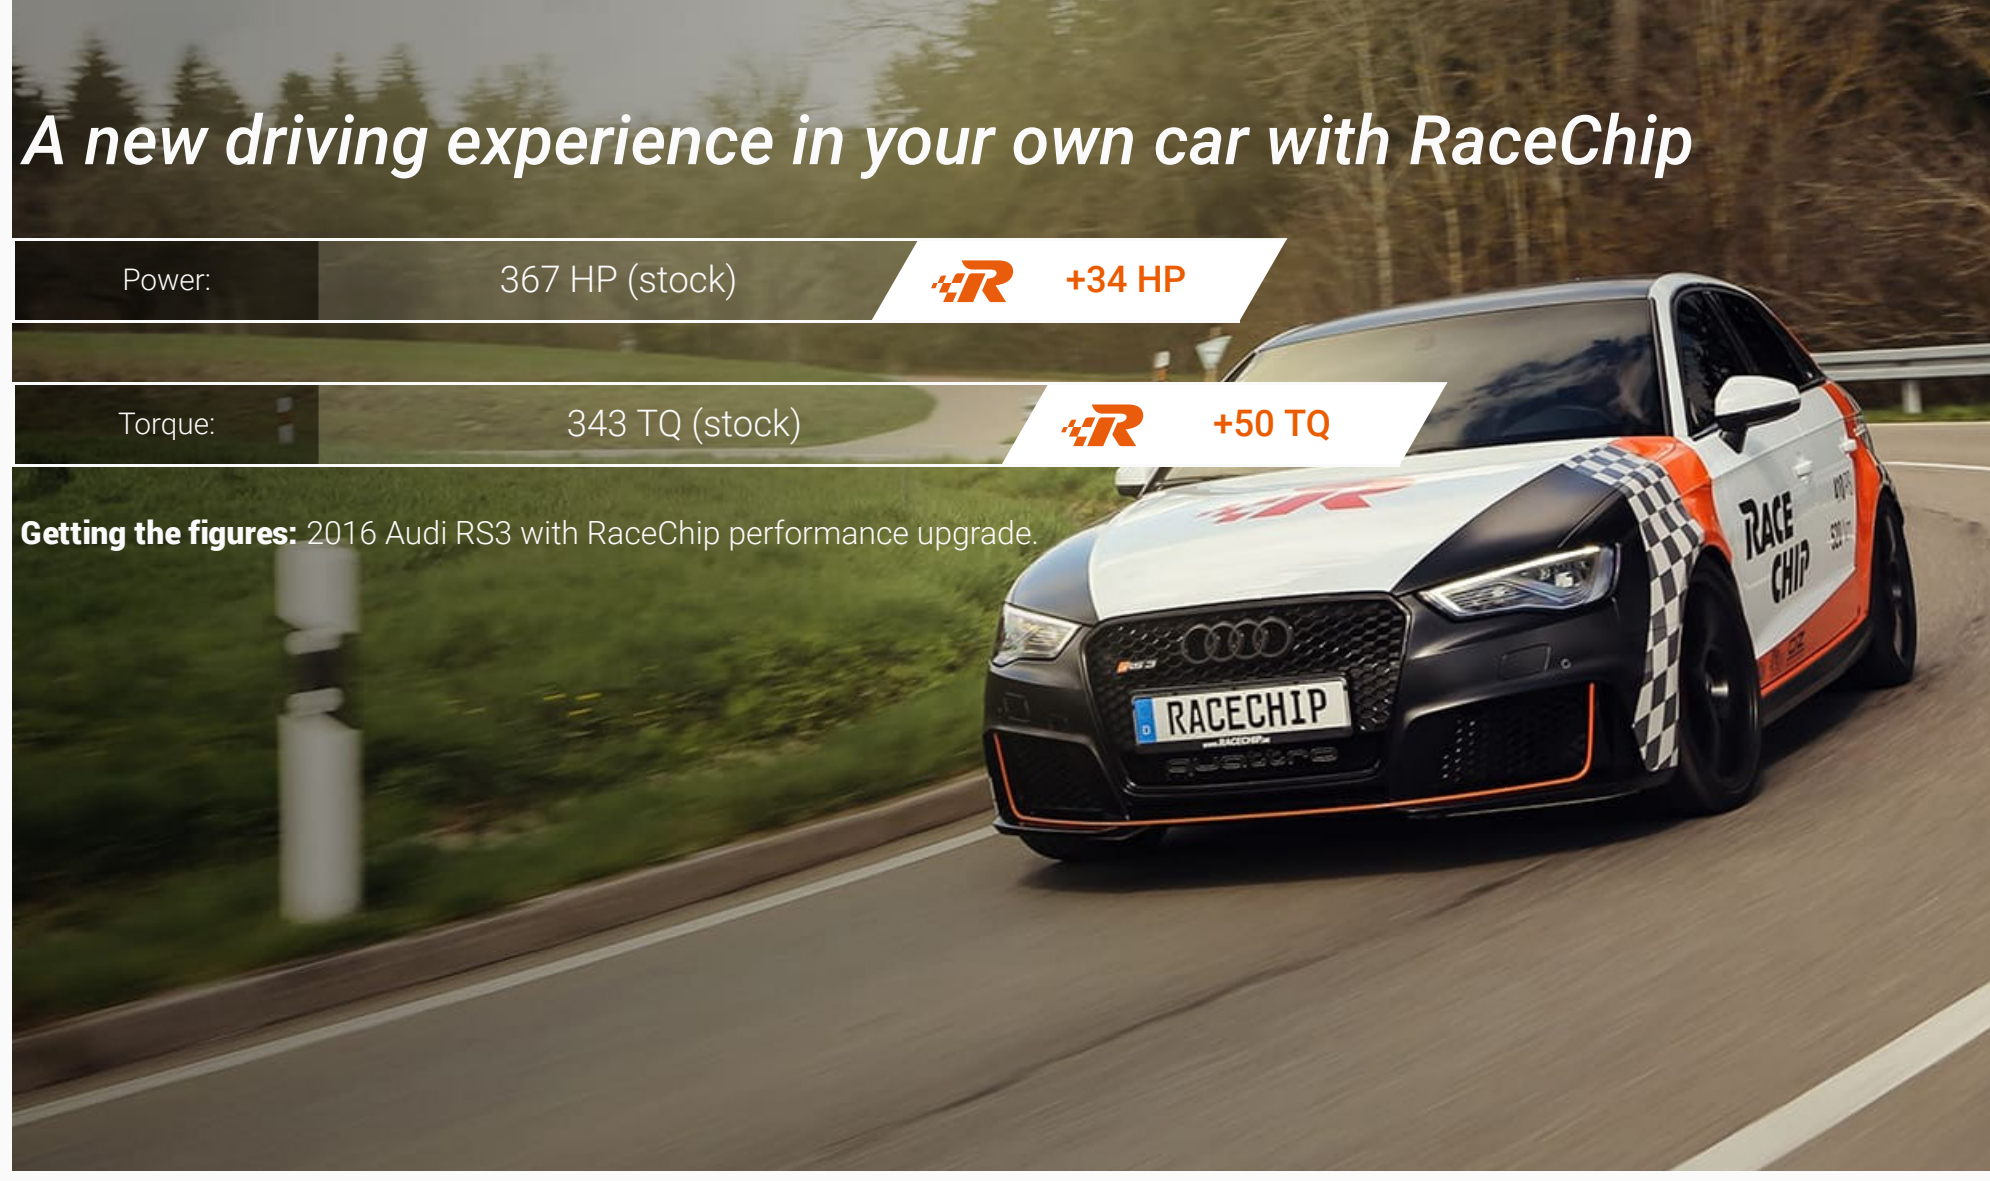

Power: 367 HP (stock)

+34 HP

Torque: 343 TQ (stock)

+50 TQ

Getting the figures: 2016 Audi RS3 with RaceChip performance upgrade.

Fine tuning is the key!

RaceChip RS comes to you with the right mapping for the engine in your car. You can also choose from 6 fine tuning mappings via the rotary control on the front side in order for the chip to gradually better fit the engine's performance and characteristics.

- ✓ 6 fine tuning mappings for a gradual custom-fit
- ✓ Perfect adjustment to your wishes

5x top rating "VERY GOOD" from Europe's toughest motoring journalists

More performance via smartphone

The app control option is available for the RaceChip RS. Use your smartphone to choose between 3 tuning modes from the RaceChip app; Efficiency for saving fuel in urban traffic, Sport for improved mid-range flexibility on open roads, Race for maximum performance. The RaceChip RS can also be deactivated via the app.

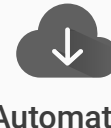

3 distinct performance modes

Adjustable warm-up timer

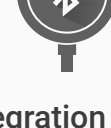

Individual fine tuning mappings

Automatic updates

Advanced service features

Integration with RaceChip XLR
