See Us At The Track!

Look around at any major racing event and you will see Racing Electronics everywhere... on the heads of the race fans, in the race cars, tooling around in one of our golf carts while assisting our loyal customers -- professional and amateur, racer or race fan.

Extended Coverage For Your Radio!

For any current model 2-Way Radio that we sell, you can now purchase two or three years of extended protection warranting against defects and breakage.* Coverage excludes water and physical damage. Batteries are also covered. Additional benefits include:

- At the track warranty exchange 24-Months
- No waiting or expense for shipping 36-Months
- No excuses, no hassle

TO PROVIDE COMMUNICATIONS FOR...
ers, Teams, Race Series & Programs

NEW!

The Platinum Line of Headsets

Racing Electronics is pleased to announce a new technical partnership with 3M. Through this exclusive relationship we have developed a new line of executive headsets – the Platinum line. Each style is equipped to perform for the most demanding customer and come equipped as follows;

- Super Soft gel Ear cushions
- Heavy Duty aluminum flex-boom adjuster
- Light Touch heavy-duty cup mounted PTT switch for each Transmit port
- Deep ear cup design for extended wear comfort & improved acoustics
- Durable and time-tested 5-pin Switchcraft accessory ports
- NRR25db

Platinum Black

The Platinum black headset comes equipped ready for work in the trenches with our heavy duty 3-piece mic boom, 150ohm noise cancelling microphone and durable scratch resistant matte black finish.

PT007

Platinum Plus

Available in 1, 2 or 3 button versions and a multitude of custom options, the Platinum Plus headset is the ideal choice for the professional spotter, crew chief or race engineer. Years of development have allowed us to offer this headset pre-loaded with the features most frequently requested. All of our most popular add-on features are also available to custom build it to meet your race day requirements. Each Platinum plus headset comes with the following standard features;

- Exclusive over-molded comfort fit padded headband
- Listen-only scanner port
- 1, 2 or 3 button versions available
- Noise-Canceling mini flex boom microphone
- Custom RE red candy-apple finish

PT006 *Single Button*

Lightweight Harness System

Raising the Standard!

We introduced our new lightweight Titanium wiring system in 2013 and it has now become the standard at the highest level of motorsports. The system is highlighted by our proprietary lightweight, abrasion resistant, Teflon jacketed, triple shielded wire. It also features miniature non-conductive connector material, and our famed upgraded pod helmet system, and every piece is made here in the USA. The entire system has been rigorously tested and is currently in use by the industry's top professional race teams.

Race Track Safety Lighting Systems

The Race Safe Track Safety lighting systems incorporate a patented encrypted digital signal that is triggered remotely to activate caution lights of your choice. Use of a Race Safe system enhances your safety commitment at your track as well as promotes greater safety to your competitors and track workers alike.

Our Wireless Safety Light Systems can trigger all of your warning lights from a single, compact control unit.

- Track Mounted Warning Lights
- Track Safety Vehicle Lights
- Dash Mounted Driver Lights

**Now used by:
ARCA,
Arena Racing,
and more!**
