

RA-6 Open Trimmer Rack

1. Place Rack Towers on trailer Floor with swivel lock flappers (A) both rotating in towards each other and flush against trailer rail approximate 3 feet apart (curb side), mark and drill holes.
2. Using the predrilled holes (B) and grade 8 bolts, bolt towers to trailer rail.
3. place trimmers on rack hooks (C) horizontally for storage. Rotate the lock flappers (A) to the closed position and use a lock or pin to secure. the bottom hook set (D) can accomodate larger tube tools such as power pruners.
4. Additional flappers, Part # (RRD) can be purchased separately from your Rack' em retailer.
