## **RS5000™X SHOCK ABSORBER**

**CROSS-TUNED TECHNOLOGY**

Inside the new, innovative Rancho® RS5000™X shock is a unique, patented valving system and advanced compression functionality. Developed by the engineers at Rancho, The Rancho RS5000X Cross-Tuned Technology will improve the vehicle's overall on- and off-road handling and performance.

### **PROGRESSIVE ENGAGEMENT VALVING:**

The Rancho RS5000X Series design includes patented progressive rebound and compression discs. At lower speeds or in the earlier stages of the Shock's travel, an eccentric disc in the valve shim stacks will engage the valving at lower frequencies, helping to control the energy of motion as the cycle of the Shock increases or decreases in its action.

When hitting a pothole, off-road trail obstacle or similar activity, **Rancho's Progressive Engagement Valving** allows for early flow of fluid, helping to reduce harsh initial impacts and to control the flow of fluid in a progressive, gradual manner through the valving.

During on- or off-road driving activities like washboard roads or when traveling a rough fire road, the early flow of fluid helps to minimize a "rough" ride as the piston movement is able to glide through the initial travel motion of the Shock with minimal ground impact or force. If needed, the Progressive Engagement Valving will further engage to maintain control and stability.

## **RS7000® MT SHOCK ABSORBER**

**MONOTUBE DESIGN**

Specifically engineered for high center of gravity light trucks and SUV's to provide the handling, control and performance expected from Rancho® RS7000® MT Shock Absorbers. These Shocks provide enhanced stability over stock twin tubes by reducing body roll in evasive maneuvers and tight turns. These Shocks feature a high-pressure gas charge that separates the unit's internal oil and Nitrogen to provide additional spring rate. This helps to maximize damping response that dissipates heat for better control. To further enhance ride control characteristics, Rancho RS7000 MT Monotube Shocks include a hydraulic lockout to cushion the impact as the vehicle suspension is fully extended. The series is covered by a Limited Lifetime Warranty and 90-Day Free-Ride Offer\*\*.

### **FEATURES**

**1.97-in. (50mm) Body Diameter**

Monotube design with high pressure nitrogen gas charge  
Off-road Fluon banded piston  
Brushed & Zinc plated with clear coated finish  
Application-specific deflective disc valving  
46mm Bore monotube construction  
14mm Hardened steel rod  
Black natural rubber bushings  
Protective boot included  
Limited Lifetime Warranty and 90-Day Free-Ride Offer\*\*

### **BENEFITS**
