4" OVAL BAR CURVED

Components:

Hardware:

Tools Required:

Torque Specifications:

For Cab Mount Installations

Cab Mount bolts are torqued to 70 Ft Lbs. All other M8 through M12 sized bolts/nuts are set to 15-20 ft lbs.

Note: When installing the brackets and bars, all hardware must be left loose until all the items are attached.

1. Remove all contents from the package and check stainless steel tubes for any damage. Also, verify that all components and hardware listed above are included before you begin installation.

2. Read installation manual and installation drawing completely. Understand all brackets and bolts before installation.

3. Begin installation on the driver's side. Remove the body mount bolts from the front and rear body mounts underneath cab of truck and discard. (Keep the bushings). Align Front and Rear Bracket as shown.

4. Install Front Mount Bracket by using one (1) Cab Mount Bolt.

Note: Make sure factory bushing is put on the same way is taken off.

5. Install Rear Mount Bracket by using one (1) Cab Mount Bolt.

6. Insert one (1) M10 Bolt Plate into the hole on the Rocker Panel. Make sure the Plastic Push nut is on the stud of the Bolt Plate to hold it into place. Repeat this for the front and rear.

HOLE IN ROCKER PANEL

Front

7. Fasten the Front Support Brace to the M10 Bolt Plate as shown. Secure using one (1) M10 Lock Washer, one (1) M10 Flat Washer and one (1) M10 Hex Head Nut (7a). Repeat this procedure for the Rear Support Brace (7b).

Note: For 2009 & Up New Body Style Dodge Ram 1500, see page 4.

8. Attach the Front Support Brace to the Front Bracket using one (1) M10 Lock Washer, two (2) M10 Flat Washers, one (1) M10 Hex Head Nut, and one (1) M10 X 30MM Hex Head Bolt (8a). Repeat this procedure for attaching the Rear Support Brace to the Rear Bracket (8b).

9. Place the Rubber Gaskets onto the Bracket Cradles. Then, place the Step Bar onto the Brackets.

10. Secure Step Bar to each Bracket using two (2) M10 Xx 30MM Button Head Bolts and two (2) M10 Lock Washers and two (2) M10 Flat Washers per bracket.

Tighten until the split lock washer is flat against bracket and snug. DO NOT over tighten and strip the threaded insert in the tube.

Repeat these steps for passenger side installation. When all hardware is in place, everything must be tightened. See Page 1 for Torque Specifications.
