

2018-2019 JEEP JL WRANGLER COIL SPRING LIFT KITS

■ RUBICON - SAHARA - SPORT - COIL SPRING LIFT KITS

■ **69-6827 - 2018-19 Jeep JL Wrangler Rubicon - 2.5" Coil Spring Lift Kit**

■ **69-6835 - 2018-19 Jeep JL Wrangler Sahara/Sport - 3.5" Coil Spring Lift Kit**

As the new Jeep JL has been hitting the streets and trails this year, consumers are demanding a well-engineered, high-quality, off-road coil spring lift solution that delivers increased stance and the ability to install larger wheels and tires, all while maintaining that all-important factory ride comfort on the street and improving JL's renowned off-road capability.

Using a decade's worth of engineering science derived from our popular JK & JL SST lift kits, our R&D team created two new versatile custom linear coil spring lift kits featuring increased spring rate. This revised spring rate translates to a much improved overall ride on the street while preventing the Jeep JL from settling or sagging with the added weight of heavy bumpers, winches and other off-road related accessories.

Both kits include CNC-bent laser cut steel shock extensions for both the front and rear and utilize an offset design to retain the factory shocks at an ideal angle for lifted situations and preserve factory ride quality.

Our two all-new Coil Spring Lift Kits go beyond the basics and include longer sway bar end links as well as custom-tailored bump stop extensions. These new bump stop extensions are an essential component when lifting the new Jeep JL. Each bump stop extension is size-specific for Rubicon or Sport/Sahara to maximize wheel travel.

These exciting new lift kits are designed exclusively for Wrangler's two distinctive vehicle configurations:

The 69-6827 Coil Spring Lift Kit provides 2.5 inches of front lift and 2.0 inches of rear lift on JL Rubicon with clearance for up to 37" tires.

The 69-6835 Coil Spring Lift Kit provides 3.5 inches of front lift and 3.0 inches of rear lift on Sahara and Sport models (non-Rubicon) with clearance for up to 35" tires.

69-6827 Shown

Part#	Max Tire	Wheel	Offset
69-6827	37X12.50	9" wide	0
69-6835	35X12.50	9" wide	0
