

MobileMule™

4 Channel Mobile DVR with Live Video Remote Viewing + GPS

The MobileMule™ 5520 is a mobile DVR designed for on-board vehicle recording which comes with remote live video viewing on a 3G/4G network. With 3G/4G, the footage can be accessed even while the vehicle is on the road, as long as it has 3G/4G service. This means easily viewing and downloading real time footage from the vehicle while it's on the road! It has four ports to record up to four cameras simultaneously and an ethernet port to connect a forward facing IP camera. The system comes with GPS to record the vehicle location and driving route as well. Footage records onto a hard drive (sold separately) expandable up to 2TB and is mirrored onto 1 SD card (sold separately) with a total storage capacity of 128GB. With a solid and compact build, the MobileMule™ 5520 is vibration-proof, installation-friendly and combines powerful functions together with a stable performance.

- 4-channel video inputs and additional ethernet port for IP camera
- Live video remote viewing (through 3G/4G)
- Hard Drive - Up to 2TB
- SD mirror recording capability - 128GB

4 Channel Mobile DVR with Live Video Remote Viewing + GPS

FEATURES

IMPROVES PRODUCTIVITY

Know exactly where your drivers are and what they are doing at all times.

SUPPORTS UP TO 4 CAMERAS

Can connect and record up to four cameras (in addition to an IP camera), records all cameras simultaneously.

CONNECT TO MONITOR

DVR connects to monitor allowing the driver to view all cameras connected in addition to recording them. Allows all trigger functions of a regular backup camera system.

GPS TRACKING

Records speed, location and exact driving route together with footage. Seamless integration with Google Maps.

GEO FENCING

Allows you to set a route and will alert you on playback if vehicle deviated off route.

LOOP RECORDING

Records camera feeds continuously, looping over oldest recordings when storage is full.

EVENTS

Can trigger certain recorded footage as events to be overwrite protected.

G-SENSOR

Recognizes sudden movements i.e. hard acceleration, sudden stops, speeding and impacts. Can set alerts to keep these recordings as events.

FLASH STORAGE

Footage records onto a hard drive with a storage capacity of up to 2TB and is mirrored onto 1 SD card with a total storage capacity of 128GB.

H.264 VIDEO COMPRESSION

High quality compression allows the greatest quality video in the smallest storage space.

DELAY POWER OFF

Up to 24 hour power off delay. To record footage even after the vehicle is shut off.

MOBILE APP

Remote access extends even to Android operated mobile devices. View the cameras together with the vehicle location directly from your smartphone!

NO ANNUAL CONTRACT

We don't charge any monthly or annual fees! We allow you to organize data plans for the 3G/4G directly through the network provider keeping your cost as low as possible.

Resolution	Image Quality	Record space/h	HDD 1TB		SD Card 128GB	
D1	1	900 MB	48 days/1ch	12 days/4ch	6 days/1ch	1.5 days/4ch
	3	540 Mb	80 days/1ch	20 days/4ch	10 days/1ch	2.5 days/4ch
	8	281 MB	155 days/1ch	38 days/4ch	20 days/1ch	5 days/4ch
