RVS-PICKUP

For a perfect backup camera system for your pickup truck, look no further than the RVS-Pickup. This system features the legendary G-Series Monitor and the Tailgate Camera which despite its small size is powerfully built to withstand all weather conditions. The G-Series monitor replaces the existing rear view mirror for a clean look. Its screen is 4.3 inches wide and pushed to the left of the mirror to be more easily viewed by the driver. For an absolute perfect backing up experience, this monitor comes with adjustable grid lines, allowing you to adjust the grid lines to be completely accurate regardless of where you mount the camera. The tailgate camera is composed of an MT9V139 sensor and a lens with a 170° viewing angle with excellent night vision. The rear view camera is completely weatherproof with an IP68 rating, strong and reliable, shock resistant with a 10G vibration rating (highest in the industry) and comes with a full year warranty. The tailgate camera mounts to the handle and looks OEM and flush with the vehicle. The camera is very easy to install and makes hitching and backing up easy.

QUICK FACT

Installs cleanly in vehicle for a factory-like finish.

System usually outlives the vehicles they are mounted on

Installation Time: 2 hours

170° Viewing Angle
Ultra wide angle

IP68 Rating
Protected against complete, continuous submersion in water

Mounts Flush Against Vehicle

Compact Design
Less than an inch in length, width and depth

Night Vision
With very little ambient light provides a great picture at night

TAILGATE BACKUP CAMERA

The Tailgate Backup Camera is built with an MT9V139 sensor and a lens with an ultra wide viewing angle of 170°. Its tiny size (less than an inch long, wide and deep) makes it ideal for smaller vehicles and allows its installation to be virtually invisible. It mounts flush against the vehicle and with an IP68 rating is fit to operate in almost all weather conditions.

Mirror Monitor

Mounts as a rear view mirror

Super Bright Digital Image

TFT LCD Display

With screen pushed closer to driver

Reflective

Acts as a mirror as well as a monitor

OEM Style

Clean, factory look

Distance Grid Lines

Optional and adjustable

OEM MIRROR MONITOR

Our OEM Style Mirror Monitor provides ultimate performance together with a clean, factory like install. It attaches to the windshield, either connecting to, or replacing the existing rear view mirror (see item options) and its bright screen and reflective ability contribute to an all-in-one backup experience. It comes with a 4.3" Color TFT Digital Display and its distance grid lines are optional and adjustable.

Turn display on and off
In port #2 only works when trigger wire activated

Enter Menu
Only works when display is on

Adjust Grid Lines' vertical and horizontal position

Rotate through menu options

Adjust selected menu option up and down
e.g. enhance brightness or decrease contrast

Adjust Grid Lines

Rotate Grid Lines

Mounting Position - RVS-Tailgate
