Product Information

Award Winning Easy EVAP™ quickly allows the technician to access the fuel vapor recovery system and create an air tight seal on any vehicle's filler neck to perform EVAP leak testing.

EASY EVAP™

Easy EVAP™: Universal filler neck connector fits 100% of vehicles, making EVAP testing quick and easy with any smoke machine.

EVAP testing has never been simpler ever with EasyEVAP™ universal filler neck connector. In seconds, this versatile adaptor creates an air-tight seal with any vehicle's EVAP system, eliminating the search for the EVAP service port. For capless filler necks, technicians can insert the new capless adaptor to access the system. EasyEVAP™ is compatible with any smoke machine, and removes cleanly from the gas cap. EasyEVAP™ is an essential tool for late model cars with fuel tank rollover valves.

Easy EVAP™ also includes:

12 sealing disks : Create an air-tight seal with any filler neck to allow your smoke machine to leak test the EVAP system. Removes cleanly and easily.
CapAdapt : Capless gas tank adaptor opens the filler neck door prevalent in late model vehicles allowing vapor easy passage to the fuel vapor recovery system.
