RedLine LumTronix round headlights will fit all vehicles (Car, Truck, Motorcycle and Motorhomes) made from 1936 to 1979 no matter what country the vehicle was made or the company that made it. Fits many vehicles made after 1979 that uses a universal round headlight or a universal size headlight such as Jeep Wrangler up to 2017.

If you are looking for a way to stand out from the crowd at your local Saturday night Cruise-In or car show, these head turning LED Halo Headlights are the perfect addition to your vehicle!

Safety First! These headlights not only look great, but provide greater visibility, typically 50% brighter than stock. In addition to a brighter light, the position of the halo provides more peripheral vision sidelight. Installing the LED Ring to act like Daylight Running Light lets other motorists see you before they pull out in front of you. In addition to head-turning lighting technology, RedLine LumTronix built-in safety features will make you feel safer driving down the road, during the daytime or nighttime.

The Halo ring uses low temperature SMD LED multi-colored diodes, some of the brightest available. Typical life span is estimated at 100,000 hours. The LED Halo lights include a credit card size wireless remote that allows you to instantly choose any 1 of 16 different colors, as well as brightness of the LEDs at the push of a button. Choose a color that matches or contrast with your color of your car. Or go for that more sinister look by choosing red.

Super easy to install as the infrared(IR) control unit only has a red wire for positive and a black wire for negative with a plug and play harness to each headlight. Allows for many connection options, depending when you want them on. Connect to your ignition and the halos always come on when your car is running or a separate switch to leave on at shows. The wireless remote also has an on/off button.
