- (2) 55/60 watt 12 volt H4 Halogen bulb
- (2) Ceramic tip pigtail H4 harness to protect the OEM headlight harness
- (6) Foam rubber pads to place in retainer ring for glass lens crack prevention

RedLine LumTronix round headlights will fit all vehicles (Car, Truck, Motorcycle and Motorhomes) made from 1936 to 1979 no matter what country the vehicle was made or the company that made it. Fits many vehicles made after 1979 that uses a universal round headlight or a universal size headlight such as Jeep Wrangler up to 2016.

Ok, you started with OEM headlights and you quickly found out you are still not seeing the road. The old OEM convex parabolic lens of yesteryear with the prisms built right into the lens blocks approximately 50% of the light from escaping the headlight. Which means less light to see the road. In contrast, RedLine LumTronix crystal clear lens gives you 50% more light and is designed with a special side lens to extend past your retainer ring. This lens is inside a lens designed to provide more side light, truly a safety innovation. The Halogen bulb is blue but when turned on it illuminates a bright white light without a blue tint.

RedLine LumTronix "Home of the Original Classic Car Halo Headlight" has done it again by bringing to the market the most advanced headlight without a halo to the market. Unlike most headlights on the

market today RedLine LumTronix specially designed headlight allows you to penetrate the darkness and brighter lighting systems of new cars driving toward you. You will see further down the road with more side light to have a truly 180 degrees of lighted viewing.

Just like projector optics found in modern vehicles manufactured today, RedLine LumTronix has brought these optics into their 7 inch headlight. So, what are the advantages of a projector headlight you might ask? RedLine Lumtronix special projector optic is made to allow the driver to project the main beam further down the road and to see object far away with less light on the side of the road.

RedLine LumTronix turn signal headlights have the added touch of a bank of LED's that act as a turn signal when connected to the vehicle turn indicator wiring harness. It can be easily seen even after the headlight's main beam is on for night driving. Three times brighter than 1156, 1156 OEM turn signal incandescent bulb.

Celebrities who use RedLine LumTronix lights: Stacey David host of "Gearz," Kevin Tetz writer for "Car Craft" magazine, Jeff Lutz winner of 2014 and 2016 Hot Rod Drag Week, 2015 Hot Rod Drag Weekend and celebrity on "Street Outlaws."
