Parts List

- (1) Top Plate
- (1) Base Plate or Cradle(Battery Relocation Kit)
- (2) Side Brackets
 - (4) Cage Nuts 1/4"-20 MC90680A138
- (1) Pull Cable mount (Switch mount only)
 - (1) S/S Button head screw 1/4"-20x.75 - MC92949A566
 - (1) S/S Nyloc Nuts 1/4"-20 - MC91831A029
- (1) Anti Vibration Pad set
- (4) S/S Button head screw 1/4"-20x.75 - MC92949A540
- (4) Nylon Washers - MC 90295A140
- (2) Studded Mounting Plates
 - (2) Press-in Studs 1/4-20x7/8 - MC93580A192
- (4) S/S Nyloc Nuts 1/4"-20 - MC91831A029
- (4) S/S Washers 1/4" - MC92141A029

1. Apply anti vibration pads to components. Note:The top plate has been designed to be mounted in all directions to achieve desired kill switch location. Metal jacket batteries do not require the use of these pads. This pad set is used in several application, therefore the use of all pads may not be required.

2. Place battery on base.

3. Locate desired mounting holes in base and slide the (2) studded mounting plates under base.

4. Attach the side brackets to the base using the supplied nuts and washers. Leave hardware loose until unit is completely assembled.

5. Attach top plate using the supplied button head screws and plastic washers.

6. Press all components firmly against battery and tighten all hardware.

7. If your kit came with a switch mount top plate. Install switch and cable mount as shown in photo on following page. See wiring instructions included with switch.

8. Mount unit into car using the factory battery mounting bolt.
