

REV Adrenaline

The quality of gasoline has diminished greatly since the EPA passed the Renewable Fuels Act that mandated a minimum addition of 10% (E10) ethanol alcohol in 2005. We expect this trend to get worse due to the new increased 2016 EPA fuel standards that call for increased ethanol alcohol levels in all gasoline (up to E15+). Most 2 and 4 stroke engines do not perform well with E10 ethanol-enhanced gasoline levels and most of us accept this as poor running equipment instead of blaming the ethanol-enhanced gasoline mixture itself. This is the reason we made REV-X Adrenaline Gasoline Fuel Additive.

Adrenaline Gasoline Additive offers a real world power enhancing formula for everyday driving applications at an economical price. Developed for both 2 and 4 stroke gasoline powered engines. REV-X Adrenaline delivers increased performance and economy that can be seen and felt, while providing protection up to E20 levels of ethanol alcohol added to today's gasoline. Adrenaline Gasoline Additive is the complete gasoline fuel additive.

That's a great start, but what else can it do?

REV-X Adrenaline's benefits don't stop at delivering increased power and fuel economy. Adrenaline contains the strongest off the shelf detergent package that cleans all fuel related components, including carburetors and fuel injectors, fuel pumps, regulators and fuel lines for optimum performance in all conditions. Adrenaline also dissolves the hard gum and varnish deposits in your engine as well, allowing better air and fuel flow to promote a smoother running engine. Adrenaline is also one of the most effective fuel stabilizers that keeps fuel fresh for up to 6 months regardless of how the fuel is stored.

Whether you are looking for increased performance, increased economy, ethanol alcohol protection, fuel system cleaner or a fuel stabilizer Adrenaline Gasoline Fuel Additive is the only logical choice.

REV-X Adrenaline Benefits:

- Increases Engine Performance
- Increases Fuel Economy
- Eliminates ALL Ethanol Alcohol Issues Up to an E20 Level
- Eliminates Corrosive Activity Within Fuel System
- Extends the Service Life of All Rubber Seals and Hoses
- Promotes a Smoother-Running Engine
- Cleans Entire Fuel System Including Injectors
- Dissolves Carbon and Varnish Deposits
- Increases Fuel Storage Life Up to 6 Months
- For Use in 2 and 4 Stroke Engines
- Treats 25 US Gallons
