Important: Please read these instructions carefully prior to installation.

Please refer to your fitting instruction to ensure that the Roof Rack System is installed in the

correct location.

Check the contents of kit before commencing fitment and report any discrepancies. Place these instructions in the vehicle's glove box after installation is complete.

Note: Be sure to check Rhino-Rack website to see if you have the latest version of instructions before beginning installation.

Maximum load carrying capacity: 100kg / 220lbs

Important Information

1 □	Check Part No.	/Kit is correct
1.1	CHECK Pail NO.	./Nit is correct

3. Fit roof rack accessory

2. Tread through motification before motaling 4. To one of an

2. Read through instruction before installing 4. Check and recheck all fasteners are secure

Maximum carrying capacity: Up to 100kg (220lbs) including the weight of the rack system.

Please refer to your vehicle manufacturers handbook for maximum carrying capacity. Always use the lower of the two figures. Load must be evenly distributed over the entire basket.

Warning: Do not attempt to fit the rack system to your vehicle unless you fully understand these fitting instructions. Please direct any questions regarding fitting to the dealer from where the roof racks were purchased.

Use only non-stretch fastening ropes or straps.

Recommendations: It is essential that all bolt connections be checked after driving a short distance when you first install your roof racks. Bolt connections should be checked again at regular intervals (once a week is enough, depending on road conditions, usage, loads and distances travelled). You should also check the roof racks each time they are re-fitted. Always make sure to fasten your load securely. Please also ensure that all loads are evenly distributed and that the centre of gravity is kept as low as possible and must be entirely contained within the extents of the

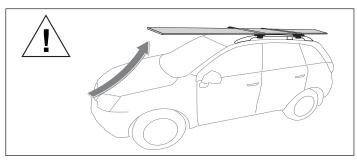

roof racks. Rack System must be removed when putting vehicle through an automatic car wash.

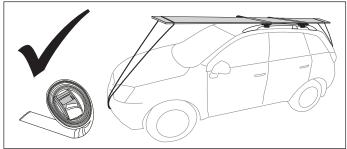

Caution: The handling characteristics of the vehicle changes when you transport a load on the roof. For safety reasons we recommend you exercise extreme care when transporting wind-resistant loads. Special consideration must be taken into account when cornering and braking.

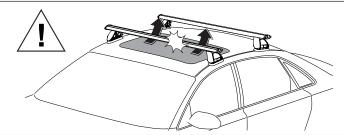

Off-road use:

The Roof Rack System may be used in off road applications, however a safety factor of 1.5 is enforced. That is, maximum permissible off road load is **66kg (145lbs)**. Although the crossbars are tested and approved to AS1235-2000/ 15011154, off-road conditions can be much more rigorous. Extreme car must be taken in off road conditions

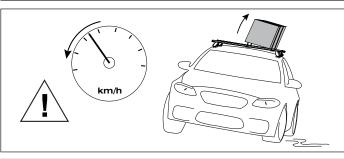

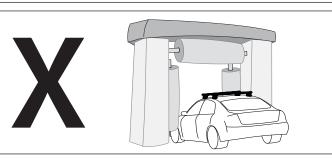

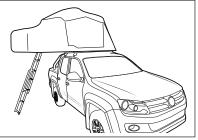

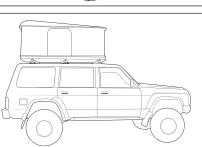

Ensure Ladder is well supported on the ground to help support tent. Take extreme caution when climbing heights above 1.2m/4ft.

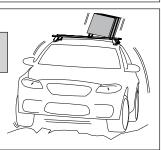

It is required for Clam Shell Roof
Top Tents to use a 3
Crossbar System.

When these roof racks are to be used on a vehicle that is driven off sealed roads, the manufacturer maximum roof load rating (to be found in the vehicles User Manual) should be *divided by 1.5.* Do not forget to subtract the complete crossbar system weight from your maximum carrying capacity.

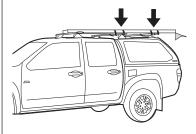

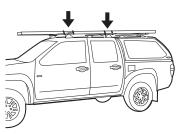

100kg/220lbs 66kg/145lbs (Urban Road) (Off Road)

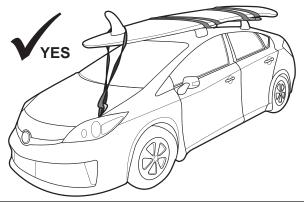

WARNING! Important Load Carrying Instructions

With utility vehicles, the cabin and the canopy move independently. Roofracks and vehicle can be damaged if the item transported is rigidly fixed at points on both the cabin and canopy. Instead, rigidly fix to either the cabin roofracks or the canopy roofracks.

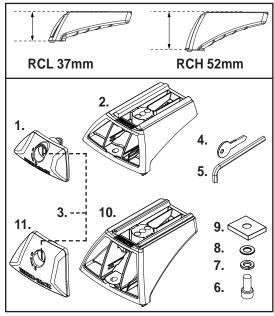

Paddle/ Surfboards should be fixed to the front of the vehicle.

Tools Required:

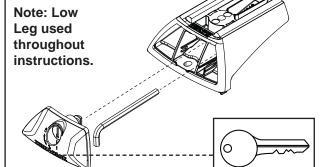

Allen Key (provided). Metal Key (provided).

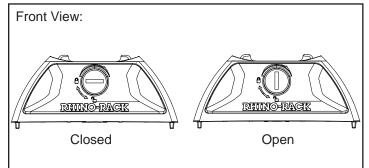

Notes:

Crossbars and Fit Kits are sold as separate and are required for individual vehicle fits. Heavy Duty Bars will require a QMHD05 kit.

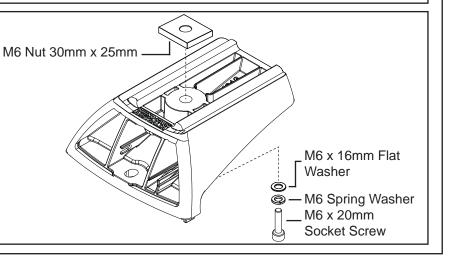

Instructions

Use the Metal Key provided to unlock the Cover Plate and remove. Remove the Allen Key from its storage position.

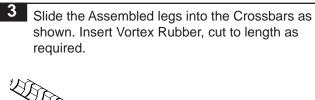

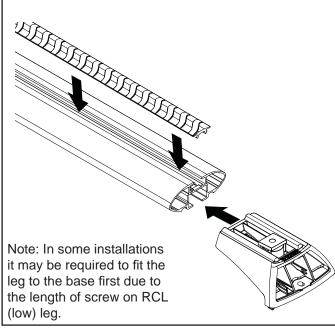

Insert the M6 hardware as shown. Finger tighten only at this stage.

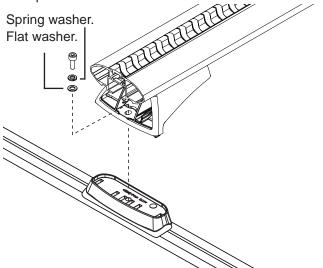

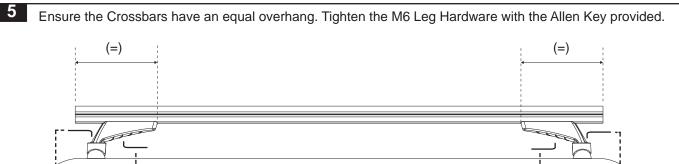

Fix the Crossbars to the vehicle specific Base Kit that has been purchased, using the Allen Key provided.

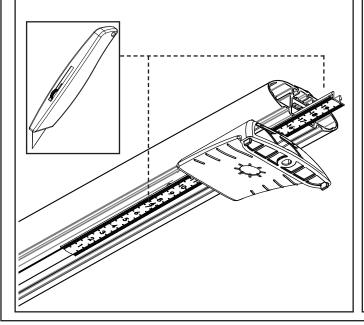

Note: Images are example only. RCL/RCH legs can be fit to either tracks or pads. Pads and track fit kits are sold as separate.

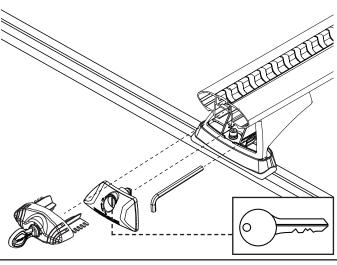

----- M6 Caps Screws -----

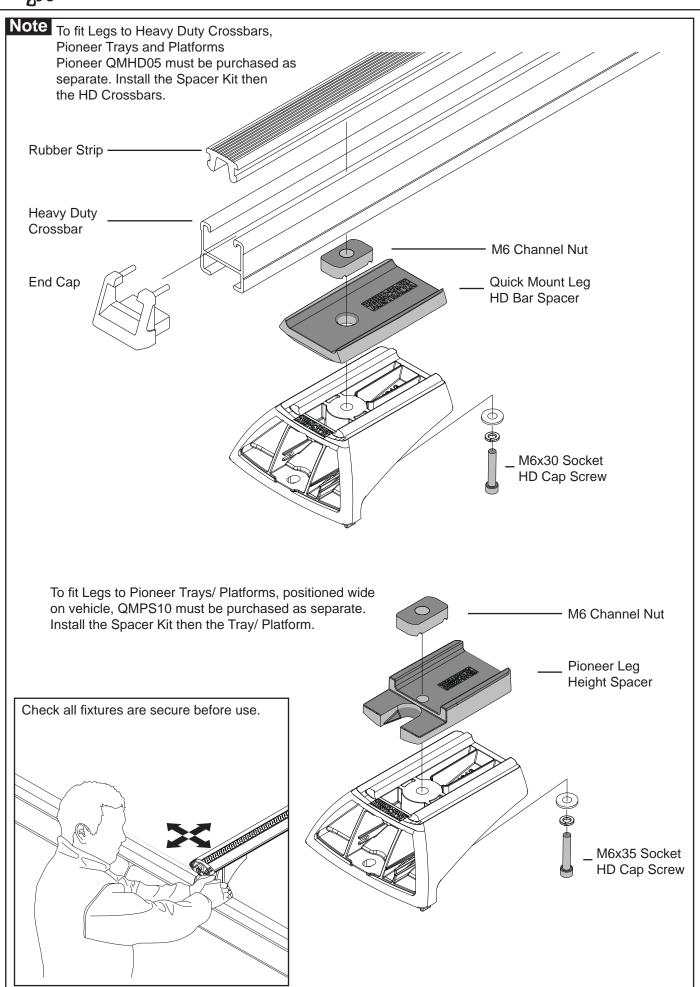

Insert the Underbar Strips into the slots either side of the installed Leg. Cut to length as required.

Insert the Crossbar End Caps and lock in place.
Replace the Allen Key and Leg Cover. Lock the
Leg Cover Plate with the key provided. Be sure all
fixtures are secure before use.

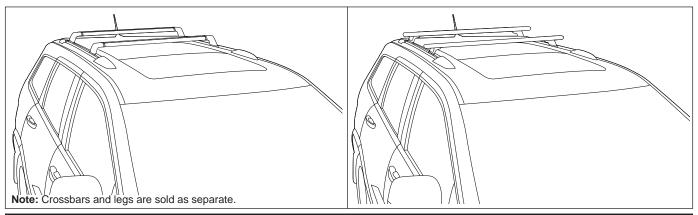

Pad Kit Jeep Grand Cherokee (RCP27-BK)

Important: Please read these instructions prior to installation.

Check contents of kit before commencing fitment and report any discrepancies. Place these instructions in vehicle's glovebox after installation is complete.

Maximum roof load: 68kg/149lbs

1. ☐ Check Part No./Kit is correct 3. ☐ Fit roof rack	accessory
---	-----------

2. Read through instruction before installing 4. Check and recheck all fasteners are secure

Note: Be sure to check Rhino-Rack website to see if you have the latest version of instructions before beginning installation.

Refer to vehicle manufacturers handbook for maximum roof loading. Always use lower of the two figures.

Recommendations:

It is essential that all bolt connections be checked after driving a short distance when you first install your crossbars. Bolt connections should be checked again at regular intervals (probably once a week is enough, depending on road conditions, usage, loads and distances travelled). You should also check the crossbars each time they are refitted. Make sure to fasten your load securely. Please ensure that all loads are evenly distributed and that the centre of gravity is kept as low as possible.

Crossbars must be removed when putting vehicle through an automatic car wash.

Carrying Loads: Use only non-stretch fastening ropes or straps to secure your load.

Caution: The handling characteristics of the vehicle change when you transport a load on the roof. For safety reasons we recommend you exercise extreme care when transporting wind-resistant loads. Special consideration must be taken into account when cornering and braking.

Load Ratings:

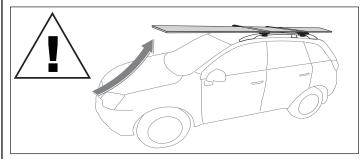

Maximum permissible load is 68kg (149lbs) for two crossbars including the weight of the crossbars, 5kg (11lbs). When crossbars are to be used in off-road conditions, please build a safety factor of 1.5 into this load limit for off-road use, two crossbars = **45kg 99lbs**). Although the crossbars are tested and approved to AS1235-2000, off-road conditions can be much more rigorous. However, increasing the number of crossbars does not increase the vehicles maximum permissible roof loading.

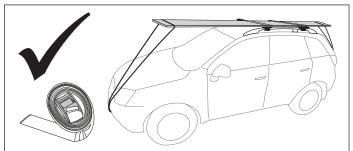

Note for Dealers and Fitters:

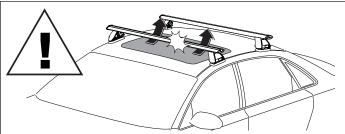

It is your responsibility to ensure instructions are given to the end user or client.

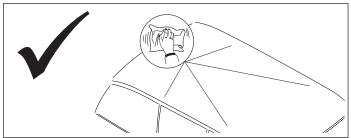

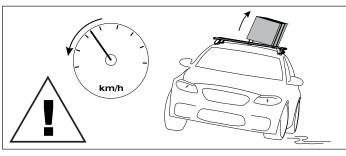

Jeep Grand Cherokee (RCP27-BK)

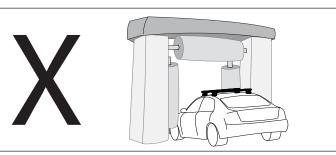

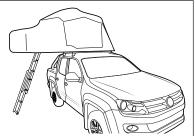

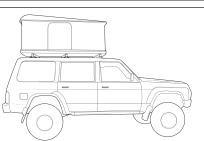

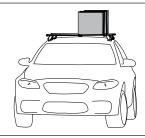

Ensure Ladder is well supported on the ground to help support tent. Take extreme caution when climbing heights above 1.2m/4ft.

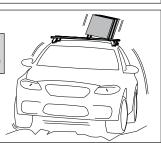

When these roof racks are to be used on a vehicle that is driven off sealed roads, the maximum roof rack load rating should be *divided* by 1.5. Do not forget to subtract 5kg from your maximum carrying capacity due to the weight of the crossbars and legs.

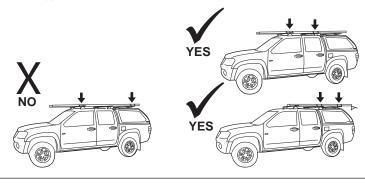

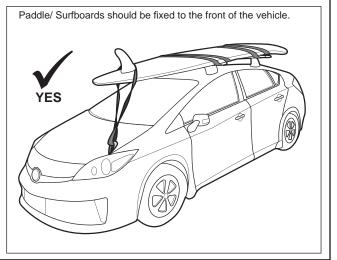

68kg load rating (Urban road) = 45kg load rating (Off road - 68kg / 1.5)

WARNING! Important Load Carrying Instructions

With utility vehicles, the cabin and the canopy move independently. Roofracks and vehicle can be damaged if the item transported is rigidly fixed at points on both the cabin and canopy. Instead, rigidly fix to either the cabin roofracks or the canopy roofracks.
