

Non-Skid Roof Pad Directions

100650

Add the Non-Skid Roof Pad to prevent any Rightline Gear Car Top Carrier from shifting on the roof of your vehicle. The Pad also protects the roof from damage caused by sharp-edged objects inside the carrier. The Pad is especially recommended for use on vehicles WITHOUT a roof rack.

1-Clean the roof of the vehicle.

2-Cut the Pad to size when using smaller carriers. A Pad that extends out from under the carrier will flap in the wind, creating unwanted noise.

3-Place the Pad on the vehicle's roof (Fig 1). Place the Carrier on the Pad and begin packing.

4-After use, wipe the Pad clean with mild soap and water, let it dry completely, and store it in a plastic bag.
