

RK Sealed Ring Chain Limited Warranty Form

Warranty covers only O.E.M. replacement grade RK SEALED chains and applications.

RK sealed motorcycle chain is warranted to the original purchaser to be free of mechanical defects in material and workmanship for 20,000 miles of street use or two years from date of purchase, whichever ever comes first. There is a one year warranty for sealed off-road chains. No other expressed warranty is offered.

This warranty shall not apply to products subjected to racing, accident, negligence, alteration, abuse, misuse, improper installation or improper uses. Please note that converting from OE pitch to a different pitch is considered an “alteration” and will void warranty. Further, the chain you have purchased herewith IS NOT AN ENDLESS CHAIN and it must be installed by using the included connecting link. Because of this it is understood that the installation, correct or otherwise is beyond the control of RK Chain, and as such, you are hereby advised that RK Chain, or it’s sales and distribution representatives, shall not be liable for any consequential, special or contingent damages, expense or injury arising directly or indirectly from any failure of the connecting link assembly of any RK Chain non-endless chain.

WARNING – A qualified motorcycle mechanic should install all drive chains and sprockets using proper tools and procedures. The seal and connecting link can be damaged if installed incorrectly and may lead to a dangerous operating condition or even accident. RK Chain strongly recommends the use of a “Rivet Type” connecting link (when available) for all applications

New sprockets should be installed when replacing the drive chain. Damaged, worn or misaligned sprockets can shorten the life of your chain and will also void this warranty. Proof of purchase is required for warranty coverage. This warranty gives you specific legal rights, and you may have other rights which may vary from state to state.
