

# SEAT ADAPTOR KIT #88279 INSTALLATION INSTRUCTIONS

## Instructions

1. Locate the mounting post (Fig.1) that came with your BrakeMaster. If needed, order part number 450596. Now, secure the post to the center of the seat adaptor using the included 3/8" x 3/4" bolt and 3/8" lock washer. If the hole is countersunk, use the Allen head bolt and lock washer included with this kit.
2. Loosen the two T40 Torx rear seat track bolts (Fig.2).
3. Align the seat adaptor as shown in Figure 3.
4. Remove the two T40 Torx front seat track bolts (Fig.4). *Note:* the mounting post on the adaptor (Fig.1) must be directly in line to the brake pedal. The BrakeMaster air cylinder may jam or function incorrectly if the mounting post is not directly in line with the brake pedal.  
Place the bracket between the floor and the front seat tracks and replace the two T40 Torx bolts you previously removed.
5. Tighten the rear seat track bolts and attach the air cylinder to the seat adaptor.

## Parts List

- (1) 3/8" lock washer
- (1) 3/8" x 3/4" bolt

**WARNING**

Failure to follow these instructions can result in property damage, personal injury or even death.
