

Contaminated Refrigerant Recovery Machine

Meets all requirements of SAE J2851

The Robinair 25700 is a contaminated recovery only device that is designed to remove contaminated refrigerant from vehicles that are equipped with R-1234yf and R-134a A/C systems.

Industry-leading efficiency and more accurate service

Features

Durable, compact, portable design allows user to recover contaminated refrigerant easily at the vehicle

Low side hoses for R-1234yf and R-134a A/C systems

80% tank full shut off safety harness prevents overfilling recovery tank

Proprietary oil-less compressor is capable of handling both liquid and vapor refrigerant

Self-purge function effectively removes any remaining refrigerant from the machine

A high pressure shut-off switch turns the machine off automatically if the pressure rises above 435 PSI to protect the equipment

Inlet filter screen stops debris from getting inside of the machine

Specifications

Operating voltage - 103-127V, 60Hz AC

2-1/2" High and low pressure gauges

1/2 HP Motor

Weight 32 lbs

Dimensions 13" x 9" x 19"

Meets all requirements of SAE J2851

Contaminated Recovery only device
