RACING WHEELS ®

*Join the  
Rocket Revolution*

# Attack

Our NEW Track & Touring Series Attack Wheels are a breakthrough in Wheel Technology! This is the first-ever, dual-direction, flow-form, semi-forged wheel production method, offering near infinite flexibility, providing options that until now were available only from expensive multi-piece wheels. This game-changing breakthrough technology delivers weight and metal strength characteristics similar to traditional high-dollar forged wheels. The Rocket Attack wheels will feature generous caliper clearances for performance brake systems, multiple offsets, premium low-maintenance finishes and ready-to-ship inventory. In addition, custom finish options and two center cap selections will be available.

Across the decades, one thing remains true: classics never die. From the Drag Strip to Main Street, the 5-spoke wheel is a legendary classic. Rocket Racing Wheels changes the game by unveiling the FIRST 6-lug, 5-spoke, classic style truck wheel. The Rocket Booster 6, mimics the sleek, hot rod design of the original Rocket Booster, but with a 6-lug mounting application. The Booster 6 is also available in a 5-lug configuration.

# Injector

▼ Injector - As Cast

As soon as our Rocket Launcher "front runner" wheels were released, we were overwhelmed by enthusiasts demanding a hardcore, traditional hot rod wheel that could be matched with the Launcher for the perfect staggered combo. Our Rocket's scientists accepted the challenge and created the classic design from drag racing's golden age. The Injector Series wheels are sculpted to perfection and available Fully Polished and As Cast finishes.

# Solid & Fire

Get aboard the Solid Rocket and Fire up your engines! Indy Roadsters of the 50's and 60's dominated the track with 6 pin drive magnesium wheels. The lighter weight six pin replaced the outdated wire-laced wheels of the 1920's and became as much of an icon as the Offy engine. The Rocket Solid and Fire are the latest addition to the Rocket Racing Wheels arsenal. The Rocket Solid and Fire feature the same classic six pin smooth design on one side and ribbed on the other. These wheels are precision crafted with durable high-tech aluminum and served up at an incredible price point. Originally, 6-pin wheels were held on by a pressure plate and knockoff. The Rocket Fire and Solid recreates the look of the original pressure plate and knockoff attachment but with the safety of a 5-lug bolt on. The Solid and Fire will fit most 16" and 18" vintage tire sizes available today. The Rocket Solid and Fire are available in As Cast, Painted and Full Machined.

# Strike

Fire first with the Rocket Strike! Our Rocket's scientists have done it again and brought this great looking classic single-rib style 5-spoke wheel from the 60's into the 21st century! The Strike offers timeless traditional styling that's sure to compliment any hot rod or muscle car, whether you're planning to cruise Van Nuys Boulevard or hit the drag strip. Available Fully Polished for a boulevard cruiser look or As Cast with a Machined Outer Lip for a more hard core drag look.

# Sunburst

The original Sunburst pin-drive wheel made its' debut on the AC Cobra in the early 1960's. The AC Cobra was one of the most important performance iconic cars of the 20th century. The first thing you notice is that the long, free flowing spokes begin at the center hub and reach all the way to the outer rim lip. The spoke length gives you the visual impression that the rim diameter is larger than a 15" diameter. The hub area is perfectly framed with what appears to be the fairing of a jet engine of an airplane and spokes that look like fins of a turbine. The NEW Rocket Sunburst available with fitments for Classic Cobras and Classic Muscle Cars of the 1960's and 1970's. Stay tuned for additional sizes to follow.

# Igniter

At the dawn of the hot rod age, a handful of gear heads in hopped-up roadsters streaked across Southern California dry lakebeds in a quest for speed and glory. Back in the glory days of vintage racing, these 5-window, kidney bean styled wheels could be found anywhere on the strip, street, or salt flats. Those lakebeds eventually became test sites for top secret rocket planes that set world speed records. The Rocket Igniter will prepare your ride for launch with the style that started it all. This painted salt flats style wheel was inspired by vintage drags and Bonneville dry lakes land speed racing. The Igniter Series are available in Fully Polished, As Cast, or Gray Painted Centers with Machined Outers.
