

WE ARE A FULL SERVICE MANUFACTURER OF TURBOCHARGERS AND REPLACEMENT PARTS.

Rotomaster began operations in 1978 as an alternative supply for turbochargers to original equipment manufacturers. In 2002, Rotomaster was reborn with new tooling to accompany its already existing range. Since then, Rotomaster has rapidly developed to provide a quality driven supply of complete turbochargers, cartridges, service kits and components.

Rotomaster is ISO certified to meet the demand for high quality manufacturing required for its market segment, and has developed with such standards to be recognized in the industry as a 'top tier' company. Rotomaster offers a wide range of products for Off Highway, Industrial, Commercial Transport, Marine, Light Truck and Passenger Car diesel/gas applications worldwide.

Concentration on engineering, flexible manufacturing, material testing, quality assurance, and technical support has driven Rotomaster to where it is today as the aftermarket leader. Rotomaster's 'in house', one of a kind, test facility provides solutions to the aftermarket and OEM manufacturers. Backed by attention to detail and excellent customer service, Rotomaster has momentum for the future and aims to establish effective aftermarket distribution worldwide.

Rotomaster welcomes new business and thanks its motivated dealers.
