

SOFT TOP STORAGE BOOT JK 07-CURRENT

Note: Please refer to your factory owners manual for proper soft top lowering procedures.

1. Open the soft top boot and wrap it around the top
Zip the center section of the boot around the top.

2. Pull the sides of the boot tight and insert the lip into side retainers on both sides of the jeep.

3. Fasten the straps around the roll bar and tighten.

4. Check all areas to insure the soft top boot is secure.
