

## Table Of Contents

### **Introduction**

Displacement Basics

### **Chapter 1: Blocks**

Block Selection

Inspecting a Used Block

Block Preparation

Align Boring

Decking

Cylinder Boring

Cam Bearings

Core (Freeze) Plugs

Final Block Prep

Factory Block Choices

### **Chapter 2: Crankshafts**

Crank Identification

Inspection and Prep

Balancing

Bearings

High-Performance Chevy Crankshafts

Harmonic Balancers

### **Chapter 3: Connecting Rods**

Early Small-Journal Rods

Large-Journal Rods

Heavy-Duty Rods

Aftermarket Rods

Rod Preparation

Side Clearance

Rod Bore Sizing

Pin Bushings

Rod Bearings

## **Chapter 4: Pistons**

Factory Pistons

Selecting Pistons

Current Factory Pistons

Forged Pistons

Compression Ratio

Valve Clearance

Piston Pins

Piston Rings

## **Chapter 5: Camshafts**

Cam Selection

Cam Drive Basics

Valve Events

Lobe Centers

Current Factory Camshaft Kits

Lifter Types

Valvesprings

Degreeing the Cam

## **Chapter 6: Cylinder Heads**

HO Aluminum Head

Cast-Iron Performance Heads

Bow Tie Racing Heads

Aftermarket Performance Heads

Head Porting

Valveguides and Seats

## **Chapter 7: Induction System**

Dual-Plane Manifolds

Single-Plane Manifolds

Factory Intake Manifolds

Aftermarket Intake Manifolds

Port Matching

Carb Spacers

Carb Selection

Fine Tuning

Electronic Fuel Injection

## **Chapter 8: Ignition System**

Ignition Basics

HEI

Aftermarket Ignitions

Secondary Considerations

Setting Ignition Timing

## **Chapter 9: Oiling System**

Production-Block Oiling

Oil Pumps

Oil Pans and Screens

Oil Filters

Cooling, Plumbing, & Gauges

Dry-Sump Oiling Systems

## **Chapter 10: Exhaust System**

Aftermarket Headers

The Complete System

## **Chapter 11: Gen II Small-Blocks: LT1 and LT4**

LT1/LT4 Features and Differences

LT1 vs. LT4 Features

Cylinder Blocks

Crankshafts

Connecting Rods

Pistons

Camshafts

Oiling System

Water Pump

Intake Manifolds

Engine Specs and Fasteners
